WEB DEVELOPER +DESIGNER

As a dynamic and growing Calgary-based branding, design and advertising agency, Fulcrum is looking for the right combination of skill set and personality to fill this challenging and rewarding position.

THE OPENING

The candidate will have all industry standard knowledge necessary to execute interactive and other web-based projects. Creating, updating and maintaining web sites that range in scope, size and client type will be an integral part of the job.

THE POSITION

This full-time position offers room for growth within a creative and collaborate environment. Our full-service agency is Mac-based and provides cutting edge software along with the tools to provide creative excellence to our clients and exceed their expectations.

HIGHLIGHTS OF QUALIFICATIONS INCLUDE

- HTML, XHTML, HTML 5, CSS3, PHP, JavaScript/jQuery, MySQL
- Knowledge of SEO and implementation for new and existing sites
- Utilization of various Adobe CS5 programs to adapt and convert files created by print design software
- Excellent understanding of cross-browser/cross-platform compatibility issues
- Experience with Adobe Flash Professional CS5 and the ability to create and adapt custom content management systems (such as MODX) is an asset
- Ability to work closely with internal teams, clients and third-party technology partners to create exceptional work is a must

If this sounds like a fit for you, apply today by sending a cover letter, resume and a link to your digital portfolio to LeRoy Parker at leroyp@gofulcrum.com by January 3, 2012.

We thank all applicants in advance for their interest, however only those selected for an interview will be contacted. Fulcrum is an equal opportunity employer.
